OPTION

THROMBOLYSIS

One overview of RCTs and one non-systematic review in people with acute myocardial infarction and ST elevation or bundle branch block on their initial electrocardiogram have found that prompt thrombolytic treatment (within 6 h and perhaps up to 12 h after the onset of symptoms) versus placebo significantly reduces mortality.

comparing different types of thrombolytic treatment versus placebo found no significant difference in mortality, stroke or major bleeding. The meta-analysis has found conflicting results on the effect of intracranial haemorrhage in people with low body weight, those with previous intracranial haemorrhage, those with tissue plasminogen activator versus alteplase, and those given intravenous versus intracranial infusion of thrombolytic agents on intracranial haemorrhage.

Speech-Language Pathology
UNIVERSITY OF TORONTO

Models of human language processing

- Highly multidisciplinary approach
- Exploit the relation between linguistic knowledge and statistical behaviour of words

Assignment Project Exam Help

<https://powcoder.com>

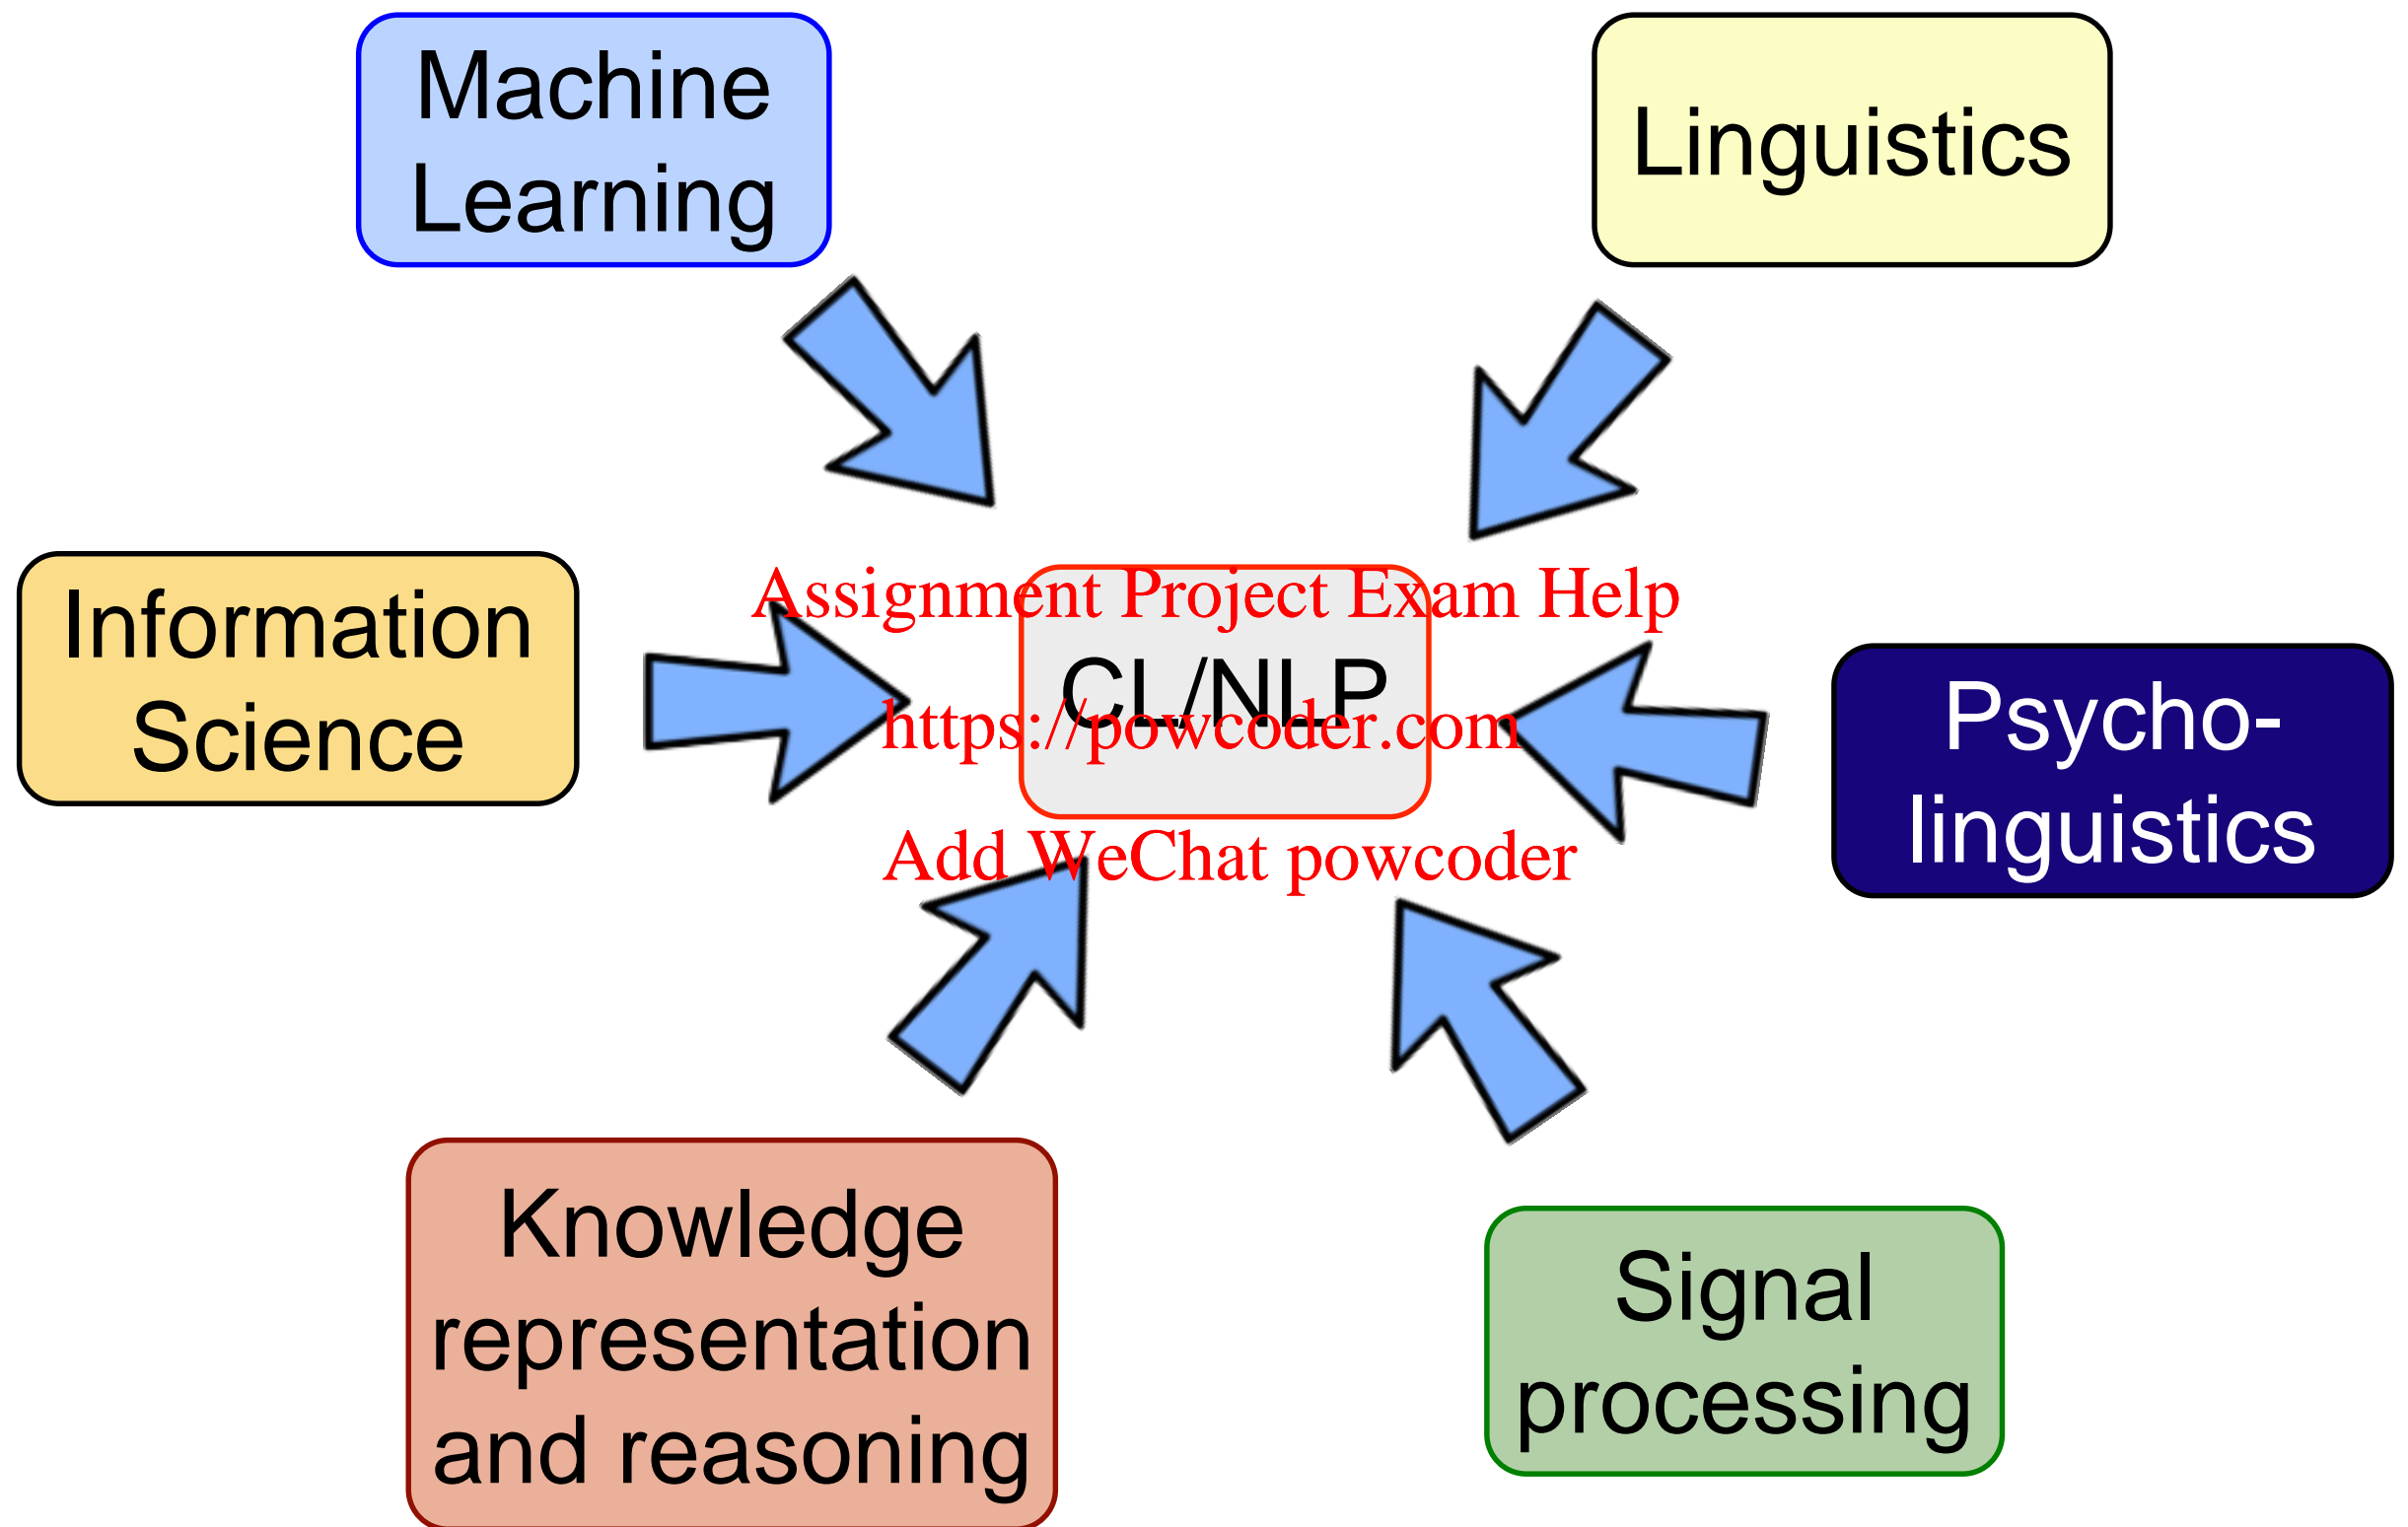

Add WeChat powcoder

Models of children's language acquisition

- Models of how children learn their language just from what they hear and observe
<https://powcoder.com>
- Apply machine-learning techniques to show how children can learn:
 - to map words in a sentence to real world objects
 - the relation between verbs and their arguments

Mathematics of syntax and language

- Fowler's algorithm (2009): first quasi-polynomial time algorithm for parsing with Lambek categorial grammars
<https://powcoder.com>
- McDonald's algorithm (2005): novel dependency-grammar parsing algorithm based upon minimum spanning trees
Add WeChat powcoder
- Parsing in freer-word-order languages

Computational linguistics 1

- Anything that brings together computers and human languages ...
 - ... using knowledge about the structure and meaning of language (i.e. not just string processing).
- *The dream*: “The linguistic computer”.
 - Human-like competence in language.

Computational linguistics 2

- The development of computational models with natural language as input and/or output.
- **Goal:** A set of tools for processing language (semi-) automatically:
 - To access linguistic information easily and to transform it — <https://powcoder.com>, summarize, translate,
Add WeChat powcoder
 - To facilitate communication with a machine.
- “NLP”: Natural language processing.

Computational linguistics 3

- Use of computational models in the study of natural language.
- **Goal: A scientific theory** of communication by language:
[Assignment Project Exam Help](#)
 - To understand the structure of language and its use as a complex computational system.
<https://powcoder.com>
[Add WeChat powcoder](#)
 - To develop the data structures and algorithms that can implement/approximate that system.

Levels of understanding 1

- **0. Keyword processing:**
Limited knowledge of **particular words or phrases**, or their collocations.
 - Chatterbots. [Assignment Project Exam Help](#)
 - Information retrieval. <https://powcoder.com>
 - Web searching. [Add WeChat powcoder](#)

Levels of understanding 2

- **1. Limited linguistic ability:**
Appropriate response to simple, highly constrained **sentences**.
- Database queries in NL.
“Show all sales staff who exceeded their quota in May.”
<https://powcoder.com>
Add WeChat powcoder
- Simple NL interfaces.
“I want to fly from Toronto to Vancouver next Sunday.”

Levels of understanding 3

- **2. Full text comprehension:**
Understanding **multi-sentence** text and its relation to the “real world”.
 - Conversational dialogue. [Assignment Project Exam Help](https://powcoder.com)
 - Automatic knowledge acquisition. <https://powcoder.com>
[Add WeChat powcoder](https://powcoder.com)
- **3. Emotional understanding/generation:**
 - Responding to **literature, poetry**
 - Story narration.

Current research trends

- Emphasis on large-scale NLP applications.
 - *Combines:* language processing *and* machine learning.
- Availability of large text corpora, development of statistical methods.
 - *Combines:* grammatical theories *and* actual language use.
- Embedding structure into known problem spaces (especially neural networks!).
 - *Combines:* statistical pattern recognition *and* some sophisticated linguistic knowledge.

Building blocks of CL systems 1

- Language interpretation, language generation, and machine translation.
- Part-of-speech (PoS) tagging.
- Parsing and grammars.
- Reference resolution.
- Dialogue management.

Historie Gymnázia Duchcov

Všeobecná touha českých obyvatel po zřízení střední školy s českým vyučovacím jazykem byla naplněna až po první světové válce. Dne 6. října 1919 začalo české gymnázium prozatímně působit v části německého reálného gymnázia. Obrovský zájem o studium (české gymnázium v Duchcově bylo jediným pro teplický, duchcovský a bílinský okres) přiměl ředitelství ústavu otevřít několik tříd i mimo německé gymnázium. Toto a všeobecné přání získat vlastní objekt stálo u zrodu záměru postavit pro duchcovské české gymnázium novou budovu. Od přání z roku 1919 k realizaci uplynulo ještě dlouhých osm let. Novostavba byla předána do užívání v neděli 22. května 1927. V průběhu desetiletí se škola stala nejen významným vzdělávacím ústavem, ale i centrem českého menšinového života, řada vynikajících absolventů svědčí o úrovni výuky. Bylo vybudováno zázemí, vytvořeny tradice, škola se dostala do širokého povědomí.

Stejně jako celá naše země prožívala své slavné i méně slavné dny. Ty nejhorší snad za války, kdy byla výuka zcela přerušena. Z hlediska stavebního budova velmi utrpěla i v letech 1948 - 1953, v době, kdy bylo zrušeno reálné gymnázium a v objektu se střídaly různé druhy škol, které zde pro své provozní potřeby prováděly stavební úpravy.

History Gymnasium Duchcov

General desire Czech population after the establishment of secondary schools and English language teaching has been filled up after the First World War. On 6 October 1919 became the Czech grammar school provisionally operate in the German real grammar school. Huge interest in the study (Czech grammar school in Duchcov was only for Teplice, duchcovský and bílinský District) led the Directorate of the Institute to open a few classes and outside the German grammar school. Such a universal desire to acquire its own building stood for the birth of intent to build a school for the Czech effort and dignified building. From the desire of the year 1919 to be implemented yet expired long eight years. New was transferred to use on Sunday 22nd May 1927. Over the decades, the school became not only an important educational institution, but also the centre of minority life, a number of outstanding graduates shows the level of instruction. It was built facilities, established tradition, the school into a broad awareness.

Like our country prožívala its famous and less famous days. The worst, perhaps during the war, when it was completely interrupted instruction. From the perspective of building a building suffered in the years 1948 - 1953, when it was cancelled real school building to pieces and various types of schools, which are for their operational needs to carry out structural adjustments.

History Grammar Duchcov

General desire of the Czech population after the establishment of secondary schools in the Czech language of instruction was filled to the First World War. 6 October 1919 Czech Grammar School began to operate provisionally in the German grammar school. The enormous interest in the study (in Czech high school was only for Duchcov Teplice, Duchcovská and Bilina district) headquarters forced the institute to open a few classes outside of the German school. This and a

general desire to get their own building was the genesis of the project to build a gymnasium for Duchcovská Czech efficient and dignified building. From the desire of the year 1919 to implement more long passed for eight years. New building was handed over for use on Sunday 22 May 1927. Over the decades, the school became not only an important educational institution, but also the center of the minority lives, many outstanding graduates shows the level of teaching. It was built facilities, created a tradition, the school turned into a broad awareness.

Like our country has endured its famous and less famous days. Perhaps the worst of the war, when teaching was completely interrupted. In terms of construction the building was seriously damaged in the years 1948 - 1953, when school was canceled and the real object is rotated different kinds of schools here for their operational needs to carry out construction work.

History Gymnasium Duchcov

- **Planning** and **plan recognition**.
- **Inferencing** and diagnosis.

Need for domain knowledge 1

Derivatization of the carboxyl function of retinoic acid by fluorescent or electroactive reagents prior to liquid chromatography was studied. Ferrocenylethylamine was synthesized and could be coupled to retinoic acid. The coupling reaction involved activation by diphenylphosphoryl chloride. The reaction was carried out at ambient temperature in 50 min with a yield of ca. 95%. The derivative can be detected by coulometric reduction (+100 mV) after on-line coulometric oxidation (+400 mV). The limit of detection was 1 pmol of derivative on-column, injected in a volume of 10 μ l, but the limit of quantification was 10 pmol of retinoic acid.

S. El Mansouri, M. Tod, M. Leclercq, M. Porthault, J. Chalom, "Precolumn derivatization of retinoic acid for liquid chromatography with fluorescence and coulometric detection." *Analytica Chimica Acta*, 293(3), 29 July 1994, 245–250.

Need for domain knowledge 2

In doing sociology, lay and professional, every reference to the “real world”, even where the reference is to physical or biological events, is a reference to the organized activities of everyday life. Thereby, in contrast to certain versions of Durkheim that teach that the objective reality of social facts is sociology’s fundamental principle, the lesson is taken instead, and used as a study policy, that the objective reality of social facts as an ongoing accomplishment of the concerted activities of daily life, with the ordinary, artful ways of that accomplishment being by members known, used, and taken for granted is, for members doing sociology, a fundamental phenomenon.

Harold Garfinkel, Preface, *Studies in Ethnomethodology*, Prentice-Hall, 1967, page vii.

Levels of linguistic structure and analysis 1

- Phonology
 - The **sound system** of a language.
- Morphology
 - The **minimal meaningful units** of language (root of a word; suffixes and prefixes), and how they combine.
- Lexicon
 - The semantic and syntactic **properties of words**.

Levels of linguistic structure and analysis 2

- Syntax
 - The means of expressing meaning: **how words can combine, and in what order.**
- Semantics
 - The **meaning** of a sentence (a logical statement?).
- Pragmatics
 - The **use** of a sentence: pronominal referents; intentions; multi-sentence structure.

Focus of this course 1

- Grammars and parsing.
- Resolving "syntactic" ambiguities.
- Determining "argument structure."
- Lexical semantics, resolving word-sense ambiguities.
- "Compositional" semantics.
- Understanding pronouns.

Tacotron 2: Generating Human-like Speech from Text

Tuesday, December 19, 2017

Posted by Jonathan Shen and Ruoming Pang, Software Engineers, on behalf of the Google Brain and Machine Perception Teams

- “We find that the proposed system significantly outperforms all other TTS systems, and results in an MOS **comparable** to that of the ground truth audio.”

“almost failed to prove incomparability”

ABSTRACT

This paper describes Tacotron 2, a neural network architecture for speech synthesis directly from text. The system is composed of a recurrent sequence-to-sequence feature prediction network that maps character embeddings to mel-scale spectrograms, followed by a modified WaveNet model acting as a vocoder to synthesize time-domain waveforms from those spectrograms. Our model achieves a mean opinion score (MOS) of 4.53 comparable to a MOS of 4.58 for professionally recorded speech. To validate our design choices, we present

the authors note, this was simply a placeholder for future neural vocoder approaches, as Griffin-Lim produces characteristic artifacts and lower audio quality than approaches like WaveNet.

In this paper, we describe a unified, entirely neural approach to speech synthesis that combines the best of the previous approaches: a sequence-to-sequence Tacotron-style model [12] that generates mel spectrograms, followed by a modified WaveNet vocoder [10, 15]. Trained directly on normalized character sequences and corresponding speech waveforms, our model learns to synthesize natural sound-

- “The overall mean score of -0.270 ± 0.155 shows that raters have a small but statistically significant preference towards ground truth over our results.” (ICASSP 2018)

Disclaimer 2

- We asked Google to provide us with Tacotron prompts for the text that we used in our study, and they refused.
- So we used Polly, Amazon's deep-learning-based TTS system.
- We asked Google which statistical significance test they used in the ICASSP 2018 paper, and they did not respond to us.

Add WeChat powcoder
- So what we are going to describe now is what most recent publications have used for significance testing.

“Significantly More Natural”

- What most people do is run Friedman’s test, together with a post-hoc pairwise comparison called the Wilcoxon signed rank test.
- This was probably selected because it is a “paired” test. Pairs = naturalness judgements by a single human subject on 2 systems/speakers. <https://powcoder.com>
- But paired implies a within-subjects protocol. MOS computes means across human judges. Add WeChat powcoder
- And the null hypothesis is very strong: the naturalness distribution of the two systems is *the same*.
- Better null hypothesis: $P(A < B) = P(B < A)$.
- Weaker null hypothesis → harder to refute.

Other Corrections

- Broaden the “human” population:
 - Professional speakers
 - Native non-professional speakers of North American English
 - Native non-professional speakers of Indian English
 - 4 dialects of Polly (AU, GB, IN, US)
- Include competitive non-deep-learning baselines:
 - 4 (non-DL) TTS systems from 2013 Blizzard Challenge
- Compare paired AB tests in addition to MOS calculations
 - Lower variance than absolute 1-5 judgements
 - Known to correlate with 6/8 ITU P.85 scales for “quality”
 - Nominal data: need Stuart-Maxwell test with post-hoc binomial sign test.

TTS M	N	S	S	S	N	N	N	N	S	S	S	S	S	S	N	S	N	M	N	

- 2013 TTS was already indistinguishable from Indian speakers.
- Polly still not distinguishable from 2013 Blizzard systems.
- First studied by USAF for cockpit speech interfaces (Sampson & Navarro, 1984).

Thurstone's Law of Comparative Judgement

- The dialectal provenance of the sample is an important factor in determining judgements of naturalness.
- AB tests can be mapped onto an absolute scale.
- These values were computed using the Bradley-Terry-Luce (BTL) model with Morrissey-Gulliksen scaling.
- As observed earlier, foreign accent helps TTS naturalness, but harms human naturalness.

The Morals of the Speech Synthesis Story

- Did deep learning usher us into a new age of human-like speech production? Well, it didn't drag us out of it.
- Deep learning is more competitive against professional readers and native speakers of North American English.
- The purpose of a scientific evaluation is to create reasonable circumstances under which the experimental hypothesis might *fail*.
